

## ***Made to Order Lean***

### **Excelling in a High-Mix, Low-Volume Environment**

#### BOOK CLUB QUESTIONS

1. We don't make similar products, so how can Lean methodologies apply and benefit our Made-To-Order or Engineer-To-Order businesses?
2. Are the Lean tools adaptable to high mix/low volume businesses, or do you need to focus instead on the Lean principals?
3. Because no processes are the same on any given day, is there a way to apply visual management?
4. How can Leader Standard Work be applied in a high mix/low volume environment?
5. Problem solving is typically prioritized based on business impact or repeatability of the issues, how can you prioritize your thousands of problems when the product or process is continually changing?

We would like to hear from you about how your book club works, the value to your team learning, and what you plan to read next.
